

## THE COMFORT YOUR PATIENTS NEED. THE VALUE YOU DESIRE.

Introducing ComfortFusion™. A value and a fit that are easy to get comfortable with. Our ComfortFusion mask has everything your patients want – a reliable seal, comfortable headgear, an easy fit and a replaceable cushion. Our FitPack™ comes with both a small and a medium cushion, enabling you to fit more than 90% of your patients – making this great mask a great value for you. It's the perfect blend of comfort and value – the ComfortFusion mask from Respiration.

ComfortFusion™

# ComfortFusion™

**Comfort and value come together in one dependable mask to benefit both you and your patients.**

The ComfortFusion mask, the newest member of the Respiration Comfort Series™ of masks, combines our years of mask design experience with our understanding and appreciation of your business needs. Your patients will love the superior seal that results from the pairing of the soft, replaceable cushion and the StabilitySelector®, along with the premium soft forehead pad and the Fusion Headgear™. You'll love that the ComfortFusion mask comes with two cushion sizes in our FitPack™— cushions that will fit more than 90%\* of your patients. Our DuoPack™ replacement kit comes with a mask (with cushion), plus an additional cushion of the same size.

The ComfortFusion mask has a familiar design that makes it easy to use, fit and achieve a robust seal. The result is a mask that's more comfortable for patients, which can lead to longer-term compliance. Overall, the ComfortFusion mask proves that comfort for your patients and value for your business belong together. And it's another example of how the Comfort Series family of masks from Respiration helps fit 100% of your patients 100% of the time.
